Healthcare Data Solutions

Proposal Cohorte 2

Institut de la vision

09/03/2015

- α Etude observationnelle d'une cohorte de patients
- α Objectifs : caractériser cliniquement cette population de manière très précise afin de mieux comprendre les mécanismes de la maladie
 - Nombre de patients : 1000 patients
 - Nombre de visites par patient : 3 (communes avec le cohorte 1)
 - Nombre de sites investigateurs : 8
 - Nombre de variables: 1500 (dont 500 communes avec le cohorte 1)
- α Durée totale : 6 ans

	Activities	Deliverables
1	Initialization meeting	Meeting report Project plan Deployment of project management website
2	CRF specifications	CRF specifications (MS Excel)
3	Workflow specifications	Workflow specifications (MS PowerPoint)
4	Reports specifications	Report specifications (MS Excel)
5	Tests plan	Tests plan (MS Word)

1

Workflow

Activities

Randomization parameters settings
Hospitalizations and follow-ups management
Workflow conditions and transitions
Transitions and associated actions

Deliverables

Java and XML files set :

- Protocol states
- Protocol transitions
- Associated actions

2

CRF and rules

(Including Core Lab forms)

CRF pages development according to specifications
Rules development according to rules specifications

Java and XML set files:

- User interface (web and PDF)
- Database mapping
- XML rules files
- Specific forms and CRF Java rules

3

Reporting module

Statistic reports development

Statistic reports set

4

Graphical chart

Graphical chart customization

Application compliant with sponsor graphical chart

1

Tests

Activities

Developer controls application according to tests plan

Deliverables

Bug reports for Release Candidate 1
Anomaly or functional evolution list

2

Correction and tests version update

Bug fixing
New features development

Application Release Candidate 2 deployed on tests server

3

Users tests

Project team controls application Release Candidate 2 according to tests plan

Bug reports for Release Candidate 2

4

Final iteration

Minor bugs fixing, detected during second iteration

Application Version 1.0

1

Application deployment

2

Training

Activities

Infrastructure requirements documentation
Support to WAR installation

Training of Institut de la vision trainers

Deliverables

Recommendations and documentation to
deploy and maintain web application

Training session
User guide

	Activities	Deliverables
1	Platform Hosting and Management	Production platform respecting SLA (Availability 99.9%)
2	User management	Ensure authorized users can access application and can be notified by email
3	Users support	

Clinigrid established a partnership with IBM and ASPaway for hosting and server management service.

	Number	Price	Total
Set up	1	€ 23'450	€ 23'450
Option SaaS IBM	72 months	€ 480	€ 34'560
Total price SaaS IBM	€ 56'015		
Option SaaS Cloud	72 months	€ 290	€ 20'880
Total price SaaS Cloud	€ 44'330
